# WHAT IS PrEP?

WHITMAN-WALKER HEALTH  
*We see you.*

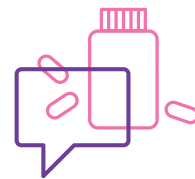

## A DAILY PILL

PrEP is a game-changing drug that greatly reduces your chances of becoming HIV-positive.

## OVER 92% EFFECTIVE

When taken every day, PrEP can be over 92% effective at stopping HIV.

## ASK YOUR DOCTOR FOR IT

PrEP can only be prescribed by a medical provider (ex. doctor, nurse practitioner, physician assistant). It must be taken every day to effectively work.

## “PrEP” stands for Pre-Exposure Prophylaxis.

**Pre** = before

**Exposure** = coming into contact with HIV

**Prophylaxis** = treatment to prevent an infection from happening

It is an FDA-approved prevention pill for people who don't have HIV, but who have a greater chance of becoming HIV-positive. When taken every day, PrEP can prevent an HIV infection by over 92%. You can use PrEP with other prevention methods, like condoms, to offer more protection. For PrEP to work, people who use it must take it every day and follow up with their doctor or medical team member every 3 months.

## More than 20,000 people in the US are now on PrEP.

Decide if PrEP is right for you.
